1. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the specific elements of the claims must be shown or the feature(s) canceled from the claim(s). No new matter should be entered. See for example Fig 3, that appears to clearly show only one piece of flexible and porous material fixed to the inside face. Neither the other piece of flexible and porous material (on the top) nor the material in which the substance is distributed (in the middle) is fixed to the inside face. Now see claims 1 and 13.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as “amended.” If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top

margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR

1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action.

The objection to the drawings will not be held in abeyance.

2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

3. Claims 1 and 4-13 are rejected under 35 U.S.C. 102(b or e) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over the references as applied in the first office action. Additionally, it is noted that independent claims 1 and 13 now recite additional elements such as the applicator comprising more than one piece of material. Even if not expressly disclosed in any of the applied references the examiner considers this additional element to be conventional in the relevant art. Applicators are conventionally formed from one or more than one layer of material depending on the specific application, and it would have been obvious to employ such an applicator in any of the devices of the applied references, for the purposes of better adapting the apparatus to apply specific products.

4. Applicant's arguments filed 1/28/08 have been fully considered but they are not persuasive. Note the comments above, and in the last office action.

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
